Summary

Engineer who builds working demos, explains setup and tradeoffs, and runs the software people use. Built self-service diagnostics for hosting customers, created a TypeScript web framework, and built model-backed workflows in a client operations platform.

Skills

- TypeScript, JavaScript, React and Node.js
- LLM APIs and model-backed workflows
- Developer documentation and example code
- API integrations, debugging and production support

Professional Experience

Founder / Product Engineer / Systems Lead

Technomancy IT LLC

Present

- Build and operate client-facing software from requirements through production support.
- Built a model-backed meeting brief that prepares a summary, decisions and actions from a transcript.

Senior Systems Engineer / Datacenter Architect

Front Range Internet Inc.

2015 - 2020

- Ran hosted web services, developed in PHP and JavaScript, and handled production escalations through the NOC.
- Built reusable diagnostics and self-service tools for operators and hosting customers.

Systems / Software Engineer

Office Evolution

2014 - 2015

- Built a front-desk troubleshooting interface for routine Wi-Fi issues and automated provisioning with Node.js.

Network & Systems Engineer

PlumChoice / Everon

2012 - 2014

- Supported small-business networks and endpoints; handled on-call issues and documented repeatable diagnostics.

Infrastructure and Systems Focal

IBM

2010 - 2012

• Built internal backup automation and wrote Perl, Bash, VBA and PHP scripts for systems work.

Selected Projects

Kerf

Independent developer tool

• Built a TypeScript and TSX framework with its own compiler, interface toolkit and routing.

NuPrice

Long-term client product

• Built and operated the customer-facing repricer, its marketplace data integrations, billing and support.

Education

Front Range Community College

Computer Science coursework

2011 - 2013
